WEDNESDAY, Dec. 13, 1865.

Gold is firm, and has sold at 145 1/2, closing at 145 1/2.

The supply of gold is ample.

Government stocks are steady, with the chief business in 7.30s at 107 1/2 for all the series.

In Railroad mortgages, State bonds and Bank shares little doing. The New Coal stocks were firm, and Schuykill sold at 134. Railway shares were stronger, under purchases to deliver by the bears, but after this demand was supplied prices receded again.

There is no little disposition shown to buy for an advance, and the market is wholly controlled by brokers and professional speculators. At the Second Board Government stocks were higher and firm, with considerable purchases for foreign account.

Erie shares, under a quotation of 39 1/2 in London, sold up to 94, but closed at 93. The latest prices were as follows: New-York Central, 92 1/2; Erie, 92 1/2; Hudson River, 109 1/2; Reading, 116 1/2; Michigan Southern, 75 1/2; Cleveland and Pittsburgh, 93 1/2; Cleveland and Toledo, 102 1/2; Rock Island, 107 1/2; North-Western, 36 1/2; North-Western Preferred, 62 1/2; Fort Wayne, 105 1/2; Ohio and Mississippi Certificates, 57 1/2.

Money is abundant at 7 per cent, "strictly on call," and long engagements are not in favor. There is a large supply of mercantile paper for sale at high rates, but purchasers are shy and give the preference to Government Currency bonds. Best paper is quoted at 7 1/2, and second quality at 10 1/2 per cent.

Exchange is nominally 109 1/2 for 60 day bills on London, and 5 1/2 for 120 day bills on London.

The Trunk railroads have commenced quarreling about rates again, and low scales are made to all Western points. The Baltimore and Ohio route is in thorough order and seems determined to win back its old business. At this time passenger fares and freights are as low as they ever were, and few companies are making any money out of the large gross traffic they report.

The following shows the receipts (exclusive of specie) from New-York to foreign ports for the week ending December 11, and since the beginning of the year.

Table showing receipts from New-York to foreign ports for the week ending Dec 11 and since the beginning of the year.

Exchange appears to be more plenty at par value, 1-100 premium selling. The discount market remains quiet, business at large being too inactive to cause the creation of much mercantile paper for its presentation, and the downward tendency of values suppresses all speculative operations. There is an ample prospect that trade will be relieved of some of its ailments, symptoms, if the present condition of things is long continued.

The business of the Sub-Treasury was: Receipts, \$4,716,777 1/4 for Customs, \$276,000; Payments,

At Boston business notes and acceptances are in good supply, and those of the first class, which have three or four months to run, are sold in the open market at 8 per cent, while other good names pay 9 1/2 and lower grades from 12 to 15 per cent.

The stock market is steady at the quotations for dividend paying securities and speculative shares, but the principal transactions are in United States bonds.
